Winograd, a US podiatrist first described the technique in 1929. 15 A large case series analysis published by Güler et al 11 in 2014, which followed 239 patients who underwent a Winograd procedure for ingrown toenails, reported that 96.3% (n = 230) were satisfied with the procedure and 231 patients (96.6%) were satisfied with the cosmetic ...

RACGP - Ingrown toenails: the role of the GP
Stage classification provides a nomenclature about the anatomic extent of a cancer; a consistent language provides the ability to communicate about a specific patient and about cohorts of patients in clinical studies. This paper summarizes the eighth edition of lung cancer stage classification, which is the worldwide standard as of January 1, 2017.

The Eighth Edition Lung Cancer Stage Classification - CHEST
I only noticed when un-installing loose files in favor of BSA version (see #1 above). This deleted the flag file and caused compiler to complain. - - found in Scripts\Source 4. Files like .DS_Store found in data\meshes - will cause problems with programs like FNIS that don't know what to do with leading dot.

Spleen injuries are among the most frequent trauma-related injuries. At present, they are classified according to the anatomy of the injury. The optimal treatment strategy, however, should keep into consideration the hemodynamic status, the anatomic derangement, and the associated injuries. The management of splenic trauma patients aims to restore the homeostasis and the normal physiopathology ...
