passing from air into water. In his view, light was a stream of particles emitted from a light source, entering the eye to stimulate sight. Newton's contemporary Christiaan Huygens showed that a wave theory of light could explain the laws of reflection and refraction.

Characteristics of Light

Download File PDF Holt Physics Characteristics Of Light

(D) The Characteristics Of Light Light is an electromagnetic wave. Light travels in a straight line. Light is a transverse wave, and does not need any medium to travel. Light can travel through vacuum. Its speed through vacuum is 3×10^8 . The velocity of light changes when it travels from one medium to another.
